

Appl. No. 10/783,342

Amdt. Dated Apr. 20, 2005

Reply to Office Action of Feb. 7, 2005

Amendments to the Specification:

Please amend the following paragraph as follows:

[0028] Another feature of the invention is to provide a plastic-molded dust-proof cover 5 which only shields the mating tongue blade 201 rather than the whole mating port of the connector. Additionally, because such a dust-proof cover 5 is equipped with the laterally extending fingers 520, it is intentionally formed with an opening 522 (FIGS. 2) in alignment with the corresponding finger 320 for compliance with the molding process. Anther feature of the invention is to provide a lateral opening 800 in the front end of each side of the assembled two half cover members 3, 4, which is laterally aligned with the corresponding lateral opening 700 located in the front end of each side of the assembled two shells 21, 22, so as to expose the front end hook 243 of the corresponding arm 242 in a lateral direction.
